2. Authorization for this examiner's amendment was given in a telephone interview with Attorney Toffeson on 09/17/2008.
3. The claims have been amended as follows:
  1. (Currently Amended) Method for producing a portable data carrier with a display device, comprising the steps:
    - providing a semifinished product with conductive paths (18) disposed in the interior,
    - producing a recess (21) in the semifinished product,
    - uncovering countercontact surfaces (26) of the conductive paths (18) in the recess (21),
    - separately applying a reflection layer (23) that is not a component of ~~a~~the display device (1) onto the base surface (22) of the recess (21),
    - inserting a the display device (1) having no reflection layer component into the recess (21), so that the display device (1) together with the separately applied reflection layer (23) forms a reflective display, and
    - contacting the countercontact surfaces (26) with contact surfaces (6) of the display device (1).

2. (Original) Method according to claim 1, characterized in that the recess (21) is formed in a multi-step fashion, the countercontact surfaces (26) being uncovered on a step (25) of the multi-step recess (21) located above the base surface (22).

3. (Currently Amended) Method according to claim 1, characterized in that the contact surfaces (6) of the display device (1) and the countercontact surfaces (26) of the recess (21) are contacted by means of an anisotropic electroconductive adhesive (13).

4. (Currently Amended) Method according to claim 1, characterized in that the display device (1) is inserted into the recess (21) in such a way that it is flush with a surface (20) of the semifinished product.

5. (Currently Amended) Method according to claim 1, wherein gaps between the recess (21) and the display device (1) inserted into the recess are sealed with a filling.

6. (Currently Amended) Portable data carrier with display device, comprising:  
a card body with conductive paths disposed in the interior of the card body,

a recess, located on a top side of the card body, which accommodates a the display device,

countercontact surfaces, in the recess, which are formed by the conductive paths, which are contacted to contact surfaces of the display device , and which are directed towards the base surface of the recess, and

a reflection layer separately applied onto a base surface of the recess, the reflection layer not being a component of the display device.

7. (Currently Amended) Data carrier according to claim 6, characterized in that the recess (21) is formed in a multi-step fashion, wherein the countercontact surfaces (26) are formed on a step (25) of the multi-step recess (21) disposed between top side of the card body (20) and base surface (22) and wherein the display device (1) has a corresponding step with contact surfaces (6) formed thereon.

8. (Previously Presented) Data carrier according to claim 6, characterized in that the contact surfaces (6) and countercontact surfaces (26) are connected with an anisotropic electroconductive adhesive (13).

9. (Currently Amended) Data carrier according to claim 6, characterized in that the display device (1) is flush with the top side of the card body (20).

10. (Cancelled).

11. (Previously Presented) The method of claim 1, wherein said portable data carrier with display device is a chip card with display.

12. (Previously Presented) The portable data carrier of claim 6, wherein said portable data carrier with display device is a chip card with display.

13.-15 (Cancelled).

#### **New Title**

4. The title has been amended to be more descriptive of the invention as follows: "Portable data carrier with a display device having a reflection layer as a separate component and applied separately from the display device".

#### **Reasons for Allowance**

5. The following is an examiner's statement of reasons for allowance: None of the prior art of record nor uncovered to date shows or discloses a data carrier with a display device having a reflection layer that is a separate component and applied separately from the display device that is now clearly recited in amended independent Claims 1 and 6 (above). Moreover, none include a recess (Claim 1), and a card body recess (Claim 6) to accommodate the display device as further recited in Claims 1 and 6. As such, these claims along with their dependent claims, are deemed allowable as presently advised.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
